FM7 TOP

FM7 TOP

FM7 TOP is a controlled temperature compressor fridge for the preservation and transport of medicines. The refrigerator is set to reach and maintain a temperature of 4°C (+/-1.5°C). Alternatively, it is possible to set another temperature within a range from 2°C to 8°C. If the set temperature is affected by a variation of more than +/-1.5°C with respect to the set temperature, two alarms will be set off: an acoustic alarm (buzzer) and a visual alarm (red flashing LED). Both alarms remain active until voluntary termination by a health care worker by means of the procedure indicated in the guide. The refrigeration unit can be moved to allow for maximum installation flexibility.

### Technical data

Height	532 mm
Width	278 mm
Depth	241 mm + 20 mm (hinge)
Product Class	from 0 to 20 litres
Type of installation	Built-in refrigerators
Gross Volume	7 L

Print date: 08/03/2018

Features and specifications are subject to change without notice.
